

Fast. Easy. Financing.

Finance your FreeWire Ultrafast EV Charging Infrastructure with Patriot Capital

Equipment financing is a proven method for electric vehicle (EV) charging owners to finance equipment for new sites, remodels or upgrades. Through our partnership with Patriot Capital, FreeWire Technologies is pleased to provide equipment financing for your Boost Charger purchases. Utilizing financing with experienced partners to fund electric vehicle charging equipment gives you the capital flexibility to operate your business while adding an attractive amenity at low upfront costs.

Product Features

Boost Charger is an ultrafast DC charger for electric vehicles (EVs). Boost Charger has a 160 kWh battery capacity with 200 kW output and only 27 kW or less input.

CAPTURE REVENUE Capture charger revenue and increased retail sales, while retaining complete control of the customer experience.

LOW COST Integrated energy storage reduces install costs by 20% by avoiding electrical upgrades and reduces operating costs by 70% by managing energy costs.

FAST & FLEXIBLE Deploy ultrafast charging 6X faster than legacy charging systems and can easily be moved between sites.

SMALL FOOTPRINT 5X more space-efficient than conventional ultrafast charging solutions.

SEAMLESS INTEGRATION Use existing power infrastructure due to lower-voltage input than conventional fast chargers.
